

## Industry never sleeps.

Nothing moves without labels.

### Toshiba industrial printers - Ready when you need them.

Keeping industry running requires a multitude of different labels – from pallet and container labelling as well as parts, product and carton labelling. At the same time global supply shortages can put in danger the entire process if any of the printers are not available. Printing pallet labels or other large format labels requires a wide web printer. Toshiba understands these needs and throughout these difficult times has endeavoured to maintain the availability of industrial printers. Whether you need 4” or 6” industrial label printers insist on Toshiba.

#### B-EX6T printer highlights

##### Industrial labelling with lowest TCO

- Long life Toshiba print heads with renowned reliability to eliminate almost any downtime.
- Unique automatic ribbon save technology as standard to reduce ribbon consumption.
- Save time & money with quick & easy replacement of labels & ribbons.

##### Fits in any environment

- For warehouses: Transport & logistics with pallet, shipping & container labelling or retail distribution.
- For industry: Automotive, pharmaceutical, food & beverage, chemical or electronics.

##### Easy installation into existing systems

- Replace your current printers with Toshiba technology without any modification to your software architecture.
- With multi-language emulations, integration into any client software is made easy peasy.

##### Increase your productivity

- Speed is never an issue as the B-EX6 can print a 6 x 8” pallet label in approx. 0.7 seconds.
- Use Toshiba’s industry-leading 800 m long length ribbons in widths of up to 134 mm to avoid production interruptions. This is up to 77% more ribbon per roll than other manufacturer’s printers can use.
- Anti-ribbon-wrinkle function to prevent ribbon waste.

##### Printer features & unique benefits

- RFID (Radio frequency identification) optional available.
- Tool-less replacement of print head and plate roller.
- Operator safety is enhanced by Toshiba’s unique damper mechanism and space-saving bi-fold cover.
- Network connectivity with IPv6 support.
