Healthcare

Industry Solutions

- > Enhance the patient experience and safety, help to put patient care first.
- > Reduce manual processes to save time, improve efficiency and reduce cost.
- > Easy integration into existing systems whilst protecting sensitive data.

TOGETHER
INFORMATION

Healthcare applications

Toshiba solutions help to directly improve measurable objectives such as service levels and patient care outcomes, understanding that managing costs and improving efficiency are also of key importance. We have developed unique applications that are easy to integrate into existing systems, protect data and at the same time enhance the patient experience.

With our extensive portfolio, we can propose fast, reliable and accurate technology throughout the healthcare and pharmaceutical marketplace. We understand the pain points and have solutions that reduce physical interactions, minimise errors, optimise workflows and accuracy of information, whilst at the same time are eco-friendly, future-proofed and deliver a low total cost of ownership.

Mobile pharmacy solutions

Administer drugs at the bedside to reduce errors, improve efficiency and enhance the patient experience.

Interactive kiosk and display screens

Interactive screens for easy navigation around the hospital, as well as displaying information and advertisements.

Managed IT services

Keep your data and infrastructure secure and running efficiently.

Desktop printing solutions

Compact, versatile, desktop printing makes it easy to record and track patient details.

Batch printing

On-demand, high-output printing, supporting multiple interfaces and GS1 barcode.

Document management systems

Improve document access and collaboration, for better patient, customer and employee experiences.

LCD hand sanitiser station

Removes physical interactions, with the ability to display live messaging, for staff and patients.

Fully approved consumables

A full range of approved consumables to support the widest range of healthcare applications, from tickets and labels to wristbands and blood bags.

Efficiency and reliability with innovative barcoding solutions

Toshiba specialist barcode and labelling solutions for healthcare organisations can help to enhance the patient experience and save valuable time and money. Innovative, future-proofed products with proven operational benefits.

And, with a wide range of Toshiba consumables available, all applications are covered. Our solutions aim to:

- Enhance the patient and staff experience.
- Protect patient records and data.
- Improve efficiency with workflow optimisation and accuracy.
- Improve internal processes with patient safety, as the primary objective.
- Integrate quickly and easily into existing systems.

Portable label solutions

Pharmacy/Mobile Pharmacy - For high quality, accurate labels, with the flexibility of many different label sizes.

- Free up hospital beds faster, by dispensing medicine at the bedside.
- Takes pressure of the pharmacy.
- Reduce repatriation risk.
- Improve the patient experience.

Desktop printing solutions

Desktop printers

Desktop Dispensary Printing - Low-cost, small footprint, multiple interfaces, with fast processing and high quality print.

- Guarantees barcode quality.
- High quality clear finish.

High performance industrial printing

Industrial printing

Production/Batch Label Printing – Large capacity label rolls, for industrial labelling applications requiring high speed batch printing.

- High volume, high speed.
- GS1 barcode support.
- Multiple interfaces.

Consumables
Toshiba Ribbons

Optimise your document workflows with print and scan solutions

Whatever the processes within your healthcare environment, optimising your document workflows along with simplifying your daily actions can be seen as a major challenge - but essential to improving the operational performance.

Toshiba multifunction printers (MFPs) offer reliable and efficient print, scan and copy functionality, and simplify common operations:

Productivity

- Direct access to the most used features with the customisable touch-screen interface.
- Automate the most complex jobs to enable the processing of large volumes of documents in one operation.
- Automatic capture (OCR¹ on-board) of documents directly from the MFP.

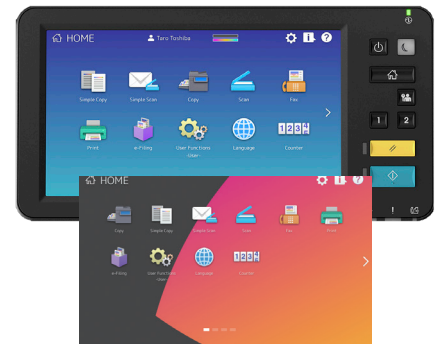

Mobility

- Printing or scanning from, or to mobile terminals.
- Direct access to cloud print/scan services.
- Wi-Fi printing.

Security

- Access control with authentication functions provides optimal security of data.
- Advanced data protection against intrusion with a secure hard drive on board.

¹OCR: Optical character recognition

Improve productivity and maximise cost efficiencies with electronic document management

The amount of information healthcare organisations have to manage is constantly increasing. Whatever the source of the data, be it paper or digital, you must be able to classify, store, share and manage the documents quickly and securely.

Time saving

Toshiba enables you to process all of your information quickly and efficiently through:

- Intelligent and automatic capture tools for indexing, naming and filing incoming documents.
- Powerful electronic document management tools to scan, index, view, share and archive your documents securely, locally or in the cloud - reducing search and filing times.
- Automated workflows to streamline document validation circuits and optimise your business processes.

Security

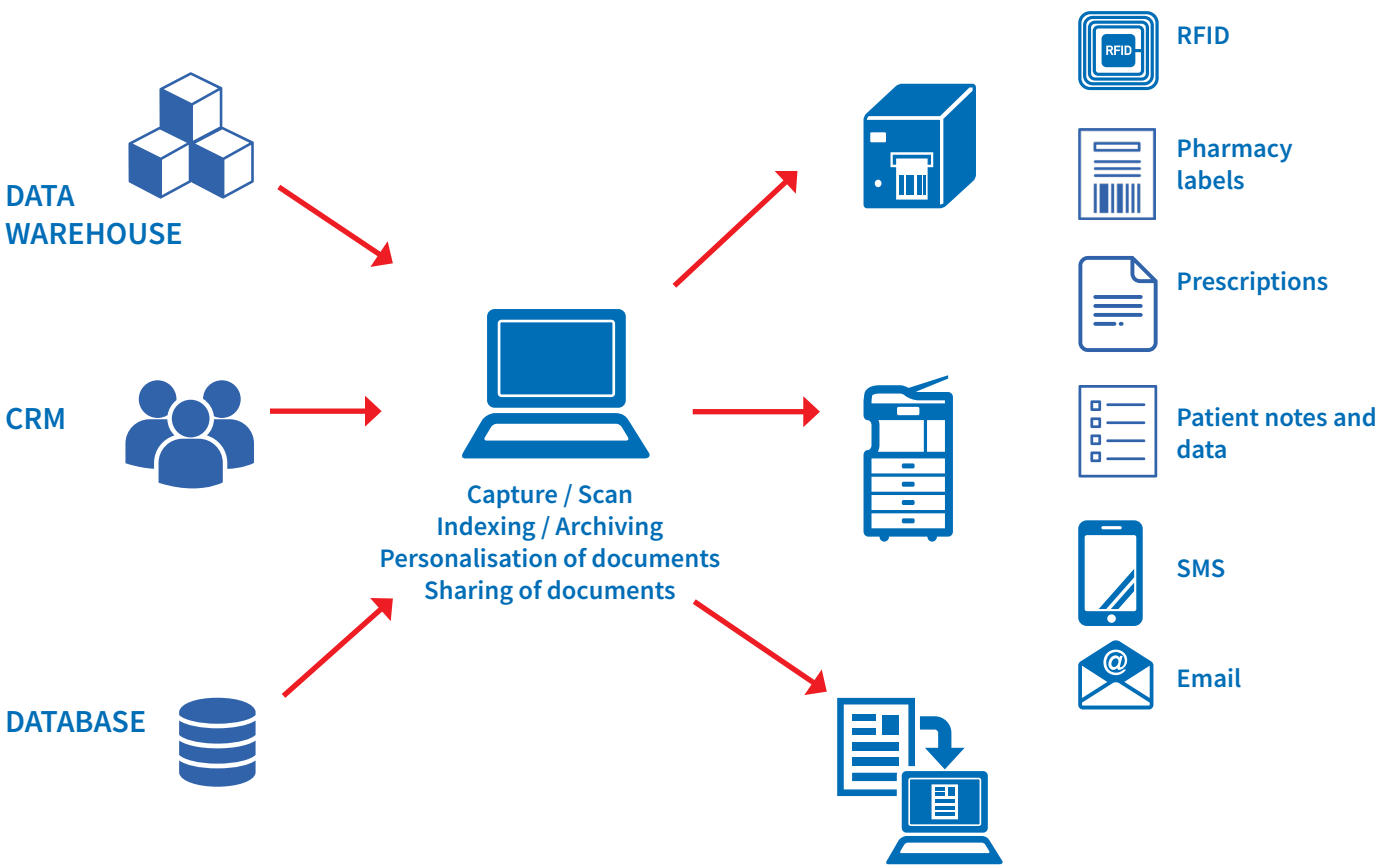

Our electronic document management solutions increase security and provide more control and traceability, providing you with:

- Secure and encrypted access, even from external systems.
- Full traceability of users and actions performed.

Customer service

Increase the quality of service to patients and staff members as a result of improved data capture and analysis.

Information and flow management

Consumables

To ensure perfect print quality, the choice of consumables (toner, labels or ribbons) is essential.

Toshiba has a **toner production plant in Dieppe, unique in Europe**, for great responsiveness in supplying its customers (drop-shipments).

Toshiba also offers **ribbons and labels certified for each application** (health, chemicals, food, textiles, automotive, etc.). These consumables improve print quality and provide the best results while minimising the wear of consumable parts such as the printhead.

Sustainable development

Toshiba is engaged in the design and production of products with low environmental impact. The group creates environmental quality standards for each product, in line with the most demanding demands of the industry.

All Toshiba products are RoHS and REACH compliant.

In addition, we calculate and offset the total footprint of a Toshiba device, through our Carbon Zero programme; from parts procurement, manufacture and transportation, providing complete carbon neutral devices upon delivery.

Protect, communicate and navigate with digital signage solutions

Toshiba's visual communications technology delivers scalable, end-to-end solutions enabling you to provide information through digital display and kiosk solutions.

LCD Hand Sanitiser Stations

Toshiba can help protect patients, staff and visitors with the introduction of intelligent LCD Hand Sanitiser stations:

- Automatically dispense alcohol based or alcohol free foam or gel sanitisers, whilst also displaying relevant messaging.
- Advantages are clear removing physical interaction as no touching of hand pumps or bottles is required.
- Display scheduled and live messaging, including the latest WHO & NHS England Media content as well as company messaging.

Digital Screens

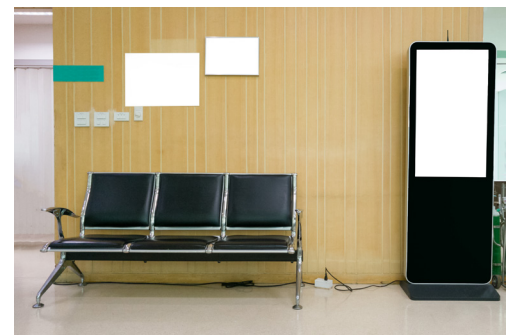

Digital displays can help you communicate important messaging, as well as provide vital information for dedicated healthcare teams:

- In key visitor areas, informative information, combined with medical advertisements.
- Potential to generate revenue streams from medical advertisers.
- Keeps patients/visitors informed and potentially entertained whilst waiting.
- 24/7 operation.
- Easy content management can change on demand.
- Multi-purpose applications.

Interactive Kiosk

To help navigate the complex hospital infrastructure, for patients and visitors:

- Interactive way finder provides information on routes around hospital for easy navigation.
- Can display key messages and important notices and health and safety information.
- Potential to generate revenue streams from medical advertisers.

Protect your IT infrastructure with Managed IT Services

As well as increasing patient protection, changes in healthcare IT must come with the highest commitment to security due to the need to protect data and infrastructure. We have the right solutions to ensure you are protected from cyberattacks.

Security against cyber attacks

Toshiba's Managed Security Services provide the protection you need to ensure your organisation is protected from cyber security threats.

Total email protection

Comprehensive security against advance email-borne threats. Prevent spam and phishing attacks and secure you data against accidental and malicious loss of data.

Advanced network security

Robust protection to secure your network and applications from advance threats.

Robust infrastructure management

Ensure business continuity with Toshiba's Infrastructure Support services. Responsive and reliable solutions helping you proactively protect your data and reduce downtime.

Remote monitoring and management

Monitor your your networks with a fully managed 24/7, 365 monitoring solution that proactively remediates server and software issues as they arise and also aligns with change management policies.

Data backup

Ensure mission critical data is protected and recovery is rapid and reliable with a fully managed, secure and scalable data protection platform.

Disaster recovery

Immediately respond to worst case scenarios and protect your data from downtime - gain complete control over your sites and easily recover from ransomware, corruption and any other disaster.
