

Retail

Industry Solutions

- > Improve internal efficiency and reduce costs.
- > Omni-channel strategy, for enhanced customer experience and retention.
- > Streamline processes to deliver accurate, up-to date information.

Retail applications

Toshiba's extensive portfolio of products in the retail marketplace, provide solutions to improve processes at every point in the retail supply chain. Customer retention and business productivity is key within this sector, we can help you to face these business challenges and streamline operations across the widest variety of applications.

Customers want easy, meaningful and unique experiences, and at the same time, retailers need to focus on improving internal efficiency and reducing business costs. Bringing the right technology into stores and back-office environments can help to simplify processes and meet the growing expectations of today's consumers.

Product and shelf edge labels

Multi-format labels for the variety of in-store shelf and product labelling requirements.

Internet retailing solutions

All-in-one dual-sided printing for picking, packing, delivery and returns labels.

Digital signage

Ordering and kiosk solutions; 24/7 screens for placing orders, wayfinding, as well as providing advertising and tailored in-store messaging.

RFID identification throughout the supply chain

Full traceability for flexible purchasing options for customers – online, in-store and via click and collect.

Document management and capture tools

For accurate data capture and streamlined document workflows.

Remote monitoring and management

A fully managed agent that sits on your servers and provides 24/7 monitoring, helping to address any issues as they arise.

Unique tagging solutions

Consumables to tackle the widest range of applications and environments e.g. plant tags.

Validated labels

Labels can be validated to ensure smooth flow through the supply chain and into store.

Price-markdown labels

On-demand labelling on the shop-floor to manage stock and inventory.

Improving efficiency and productivity with barcoding solutions

To meet the demands of today's omni-channel retail operations our barcoding solutions are agile and flexible. The range includes dual-sided solutions for fast despatch in internet retailing, portable printers for quick and easy labelling on the shop floor and RFID industrial printers for stock management and applications with a high workload that require high-speed printing.

Our eco-friendly solutions offer various savings, including lower media costs with less wastage, to help you reduce operational overheads, meet the tightest deadlines and improve productivity. And, with a wide range of Toshiba consumables available, all applications are covered.

Internet retailing printing solutions

- Streamline despatch process.
- Picking list, delivery note and returns label, in one print.
- Ultimate in environmentally friendly and efficient printing.

Industrial printers

- Robust and rugged high performance labelling for demanding applications.
- Enhance operational efficiency with unique options, like rotary cutter and ribbon save modules.

Portable printing

- Fast and flexible in-store labelling, ideal for mark-down applications.
- Quick and efficient management of stock and inventory.

RFID solutions

- Track and trace the product through its lifecycle.
- Perfect for omni-channel operations and improving stock visibility.

Optimise your document workflows with print and scan solutions

Whatever the processes within your retail environment, optimising your document workflows along with simplifying your daily activities can be seen as a major challenge - but essential to improve the operational performance of your business.

Toshiba multifunction printers (MFPs) offer reliable and efficient print, scan and copy functionality, and simplify common operations:

Productivity

- Direct access to the most used features with the customisable touch-screen interface.
- Automate the most complex jobs to enable the processing of large volumes of documents in one operation.
- Automatic capture (OCR¹ on-board) of documents directly from the MFP.

Mobility

- Printing or scanning from, or to mobile devices.
- Direct access to cloud print/scan services.
- Wi-Fi printing e.g. print confirmation of orders from tablets, from around the store.

Security

- Access control with authentication functions provides optimal security of data.
- Advanced data protection against intrusion with a secure hard drive on board.

¹ OCR: Optical character recognition

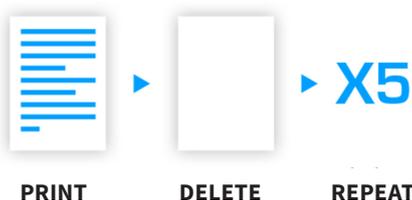

With the Hybrid MFP, choose your “CLASSIC” or “ERASABLE” printing mode

- **In black ink, print the documents to be kept** | final versions, invoices, signed contracts, etc.
- **In blue ink, print “temporary” documents** | such as order preparation documents, picking lists, etc.

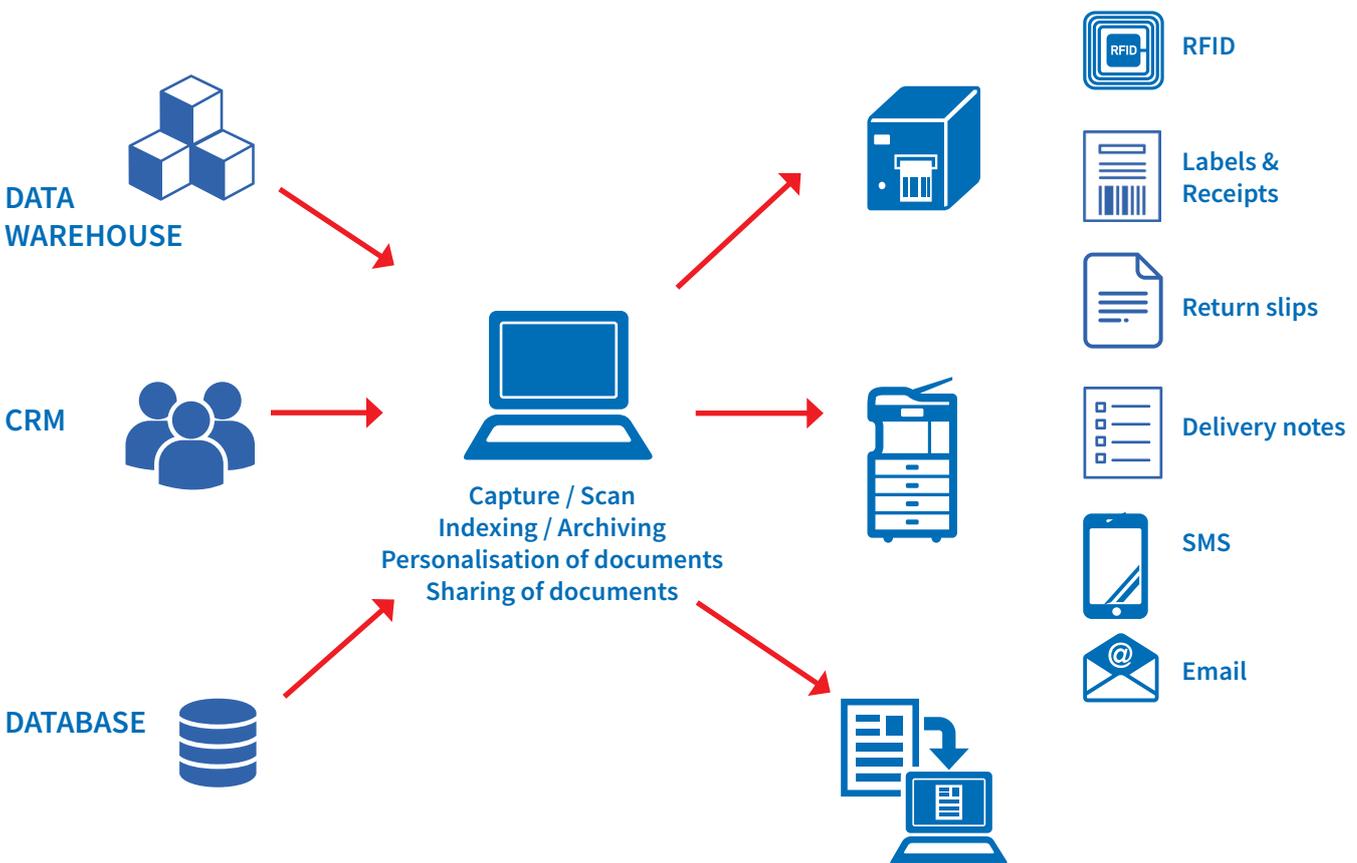

GLOBAL INNOVATION

With erase functionality, the Hybrid MFP allows you to reuse the same sheet up to 5 times and save up to 80% on paper.

Information and flow management

Consumables

To ensure perfect print quality, the choice of consumables (toner, labels or ribbons) is essential.

Toshiba has a **toner production plant in Dieppe, unique in Europe**, for great responsiveness in supplying its customers (drop-shipments).

Toshiba also offers **ribbons and labels certified for each application** (health, chemicals, food, textiles, automotive, etc.). These consumables improve print quality and provide the best results while minimising the wear of consumable parts such as the printhead.

Sustainable development

Toshiba is engaged in the design and production of products with low environmental impact. The group creates environmental quality standards for each product, in line with the most demanding demands of the industry.

All Toshiba products are RoHS and REACH compliant.

In addition, we calculate and offset the total footprint of a Toshiba device, through our Carbon Zero programme; from parts procurement, manufacture and transportation, providing complete carbon neutral devices upon delivery.

Streamline processes with electronic document management

The amount of information retail operations have to manage is constantly increasing. Whatever the source of the data, be it paper or digital, you must be able to classify, store, share and manage the documents quickly and securely.

Time saving

Toshiba enables you to process all of your information quickly and efficiently through:

- Intelligent and automatic capture tools for indexing, naming and filing incoming documents.
- Powerful electronic document management tools to scan, index, view, share and archive your documents securely, locally or in the cloud - reducing search and filing times.
- Automated workflows to streamline document validation circuits and optimise your business processes.

Security

Our electronic document management solutions increase security and provide more control and traceability, providing you with:

- Secure and encrypted access, even from external systems.
- Full traceability of users and actions performed.

Customer Service

- Increase quality of service to internal and external customers as a result of improved data capture and analysis.

Improve the customer experience with digital signage solutions

Toshiba's visual communications technology delivers scalable, end-to-end solutions enabling you to provide information through digital displays to attract and entertain customers, whilst capturing data to understand buying behaviour and patterns for advertising, promotions and stock management.

Display screens (controlled by media content players)

- Automated promotions/digital pricing; advertise/promote messaging in shop windows.
- Menu boards – display menus/product of the month above cash tills .
- Product prediction/trending – identify which item to promote to who on which day or time.

Cameras/Interactive screens/totems

- Use cameras for facial recognition – analytics help to identify your audience and identify consumer trends.
- Order terminals; navigation terminals to help guide consumers to where you want to go.

Protect your IT infrastructure with Managed IT Services

Cybersecurity threats are ever-evolving and adapting to challenge, and these mounting risks are having a serious negative impact on IT infrastructure, be it risk of loss of data, reputational harm, loss of productivity, or cost of repair. We have the right protection to ensure your organisation is protected from these threats.

Security against cyber attacks

Toshiba's Managed Security Services provide the protection you need to ensure your organisation is protected from cyber security threats.

Total email protection

Comprehensive security against advance email-borne threats. Prevent spam and phishing attacks and secure you data against accidental and malicious loss of data.

Advanced network security

Robust protection to secure your network and applications from advance threats.

Robust infrastructure management

Ensure business continuity with Toshiba's Infrastructure Support services. Responsive and reliable solutions helping you proactively protect your data and reduce downtime.

Remote monitoring and management

Monitor your your networks with a fully managed 24/7, 365 monitoring solution that proactively remediates server and software issues as they arise and also aligns with change management policies.

Data backup

Ensure mission critical data is protected and recovery is rapid and reliable with a fully managed, secure and scalable data protection platform.

Disaster recovery

Immediately respond to worst case scenarios and protect your data from downtime - gain complete control over your sites and easily recover from ransomware, corruption and any other disaster.
