

## Cloud Based AP Automation Solution

ancoraDocs was developed to bring simplicity to a technology that historically has been complex, over-priced and difficult to configure, install, use and maintain.

### The industries only true multi-tenant SaaS AP Advanced Data Capture Solution

- Built to take advantage of latest cloud deployment architecture including the use of Kubernetes containers to automate deployment, scaling, and management.
- All clients are 100% web based with a zero footprint install.
- All customers data is in a separate database and separate operating environment.
- One customers processing peaks do not effect other customers performance.

### Cloud vs On-Premise Deployment

<b>COST</b>	Payments are based on a monthly subscription fee—monthly expense.	All hardware and software cost are paid up-front—capital expense.
<b>IMPLEMENTATION</b>	Hardware and software are installed in the cloud, no involvement by customer.	All hardware and software are purchased and installed by customer.
<b>SECURITY &amp; BACKUP</b>	All security and data backup are provided automatically by software provider.	The company is required to provide access security and data backups.
<b>SUPPORT</b>	Maintenance and technical support are included in the monthly subscription fee.	Maintenance and technical support is an additional annual cost in addition to server admin cost.
<b>UPGRADES</b>	Hardware and software upgrades are included in the monthly subscription fee.	The company is responsible for the purchase and install of upgrades.
<b>GROWTH</b>	Growth is handled by the software provider.	As the company grows it is their responsibility to purchase/install additional hardware and software.
