

Cloud Fax

- Lets employees receive and send faxes as electronic messages, directly from their existing email accounts.
- Reduces fax costs by up to 70% by eliminating the need for fax servers and other physical infrastructure.
- Optional Microsoft Office® toolbar lets you send attachments from any Office application.

Your Fax Solution

As a fully outsourced or hosted fax service, Cloud Fax offloads the entire fax function from your IT team while helping to align fax services with the business goals and strategic direction of your enterprise.

Cloud Fax is a 100% hosted faxing service that allows your employees to receive and send faxes as electronic messages directly from their existing email accounts – anytime, anywhere. It eliminates the need for fax servers, fax machines, and related infrastructure, reducing fax costs and improving productivity.

Key Features

- Eliminate capital costs, software fees, telecom charges & ongoing maintenance with a 100% cloud-based solution.
- Use industry-standard 128-bit encryption to secure all sent and received files.
- Ensure delivery with no busy signals or capacity constraints.
- Send attachments from Outlook, Word, Excel and PowerPoint with the optional Microsoft Office® toolbar.
- Be environmentally friendly and reduce your carbon footprint with less paper, toner, and other supplies.
- Increase employee productivity with digital faxing and mobile printing.
- Satisfy your organisation's corporate governance requirements.
- Inbound faxes received as PDFs can be searched, edited and have electronic signatures appended.
