

Disaster Recovery as a Service (DRaaS)

Datasheet

- > Drastically reduces capital costs.
- > Predictable monthly disaster recovery service.
- > Eliminates time spent on acquiring and configuring hardware.
- > Allows IT staff to focus on core business requirements.

Use our DRaaS solution to immediately respond to worst case scenarios and protect your data from downtime.

Toshiba's Disaster Recovery as a Service (DRaaS) gives you more ways to protect critical workloads with a consistent and continuous Disaster Recovery (DR) process. Our intuitive Cloud-based portal enables you to test Disaster Recovery with zero impact on your production systems and leverage leading Cloud providers including Microsoft Azure and Amazon Web Services (AWS).

From a single console, you gain complete control over all your sites and can easily recover from ransomware, corruption and any other disaster. Our team of experienced engineers are available 24/7 to support live invocations, scheduled tests or general enquires and are there for you no matter what.

Features

- **Service Agility** - The fully managed service offers multiple tiers of service and functionality.
- **Ease of Management** - Single unified interface for management of data policies and reporting.
- **24/7 Proactive Service Management** - Enabling customers to prioritise and focus on non-DR related priorities.
- **World Class Service Methodology & Execution** - Backed by ITIL process and ISO27001 certification.
- **Concise reporting** - Enabling security for clients in completion and ownership of Data Protection.
- **Strict SLAs** - Proactive management platform with stringent SLAs (with penalties)
- **Highly-Resilient Data Centres** - UK-based, highly resilient Tier 3 Data Centres

The infographic features a dark blue background with a white map of the United Kingdom. Three blue circular markers are placed on the map, corresponding to the locations of the data centres: London, Maidenhead, and Manchester. To the left of the map, there are four horizontal sections, each with a white icon and text: a clock icon for '24x7x365 Support On All Services', a checkmark icon for 'ISO 27001 Certified', a folder icon for 'PCI & GDPR Aware', and a percentage icon for '99.99% Availability of Services'. To the right of the map, the text 'UK-Based Tier 3 Data Centres:' is followed by a bulleted list of the three locations.

24x7x365
Support On All Services

ISO 27001
Certified

PCI & GDPR
Aware

99.99%
Availability of Services

UK-Based Tier 3
Data Centres:

- London
- Maidenhead
- Manchester

Our DRaaS solution, powered by Zerto, helps you protect your business against worst case scenarios. Our purpose built solution enables you to leverage UK-based Data Centres and leading Public Cloud providers including Azure and AWS to minimise risk and get you back up and running.

Benefits

No Capital Investment for 'Just in Case' Scenario - No provisioning of a second site, standing up infrastructure, deploying software or additional headcount – Give engineers their weekends back.

Simplified Testing - One click failover testing and failback at any time of day with our consultants available to assist.

DR Reporting/Compliance - Detailed service level reporting or DR testing for executive management and governance.

No Impact DR Testing - Zero impact testing of failover process.

Granular Data Consistency - Adherence to aggressive RTO/RPO requirements.

Superb Service Levels - RPO's measured in seconds and RTO's measured in minutes – guaranteed SLA of 4 hours.

Built-In Failback Functionality - Simple post-DR return to business as usual helps you get back to normal after a disaster.

Flexible Topology Configuration - Single source, multiple destinations.

Ransomware Protection - Point in time recovery to consistent pre-attack points.

Application Consistency - Maintain application integrity across all application components.

Why choose us?

- **Reliable 'as a Service' Model**
- **Fully Customised**
- **Experts in Data Recovery**
- **A Range of Options**
- **Powered by Zerto**
