

Home Working Solution

Datasheet

- > Users can access their office computers from any personal device.
- > Deploy to workstations in minutes and connect to a computer or remote device in seconds.
- > No need for a VPN connection.
- > Fully secure with encrypted communications.
- > Data is simply viewed from a different location - not downloaded - keeping corporate data safe.

Enable your staff to work from home.

Provide a secure link so members of staff can use a home-based device to work on their office PC's remotely. Enabling them to have the right tools to work from home without deploying additional hardware assets.

You can also view the screen and control the desktop of your employees' devices to provide fast remote support.

Licensing

- **All-in-one** - One license includes remote support, remote access, live chat and web. conferencing software, as well as the mobile app versions of all products. Licensed annually per user.
- **Unlimited installations** - You may run the Remote Access software on an unlimited number of computers or mobile devices.
